OBJECTIVE

I am a Full-Stack Developer with a deep curiosity for learning and a strong passion for staying up-to-date with the latest technologies. I love building efficient and scalable systems, and I constantly challenge myself to improve. This is who I truly am—driven by code, innovation, and continuous growth.

SKILLS & ABILITIES

- | | | |
|--------------|-----------------------|----------------------|
| • HTML | • React.js | • Docker |
| • CSS | • Node.js | • AWS Services |
| • Java | • Git | • Azure App Services |
| • JavaScript | • MongoDB | • CI/CD Pipelines |
| • Next.js | • Agile methodologies | • RESTful APIs |

EXPERIENCE

October 2023-May 2025

Full Stack & DevOps Engineer

MoonDive

- Designed and deployed 20+ reusable UI components in React, significantly boosting development speed and consistency across the platform.
- Participated in regular strategy meetings with a former Engineering Manager from Microsoft, Expedia, and Meta, contributing to the creation of 25+ reusable components, which reduced engineering effort by 30%.
- Developed 30+ RESTful APIs to support complex business logic, enhancing backend scalability and seamless integration with various services.
- Advocated for agile methodologies, resulting in a 40% improvement in development speed, team collaboration, and project delivery timelines.
- Strengthened application security by implementing comprehensive measures, reducing vulnerabilities by 50% and ensuring industry-standard compliance.

June-2025

Director – Technology & Social Impact

Dharnika foundation

- Participated in community-focused tech programs, helping bridge the gap between technology and underserved populations.
- Collaborated with cross-functional teams to design and develop web-based solutions using JavaScript, HTML, CSS, and React to address real-world social challenges.
- Supported digital transformation initiatives by optimizing internal workflows and implementing technology-driven solutions, improving operational efficiency and system accessibility.

- Contributed to community-focused technology programs by assisting in application development, feature enhancements, and technical support to improve user engagement and reach.

EDUCATION

June 2022

Master Of Computer Applications

LDC Institute of Technical Studies, Prayagraj, AKTU University

PROJECTS

MORES - Real Estate Web App

MORES is a MERN stack real estate web application with roles for user, agent, and admin. It features M-verification, where admins assign agents to verify property listings and aid in selling properties. This project involves advanced authentication mechanisms using JWT token. The application is designed to be fully responsive, providing an optimal user experience across mobile phones, tablets, and desktop computers. Responsive design ensures seamless usability and accessibility across all devices, enhancing user satisfaction and engagement.

MoonDive Website

Engineered the Moondive site with Next.js, integrated Google Calendar API for scheduling meetings, and improved stakeholder engagement. Integrated a contact form to collect inquiries and send details to designated email addresses.

AWARDS AND RECOGNITION

MoonDive Hackathon Winner 2024.
